

Dissertation Evaluation Report

- Generated at: 2026-04-15T18:10:38.346331+00:00
- Device filter: DEMO-SARIMA-001
- Target range: 2026-04-15T00:00:00+00:00 .. 2026-05-15T00:00:00+00:00
- Actual range: 2026-04-15T00:00:00+00:00 .. 2026-05-15T00:00:00+00:00
- Forecast run IDs: 261, 262, 263
- Horizons: 24h, 7d, 30d
- Models: sarima, lstm, ensemble
- Baseline action: no_action
- Bootstrap samples: 300
- Bootstrap block size L: auto
- Forecast points: 20571
- Points with actual (raw): 20571 (100.0%)
- Points compared (strict): 18774 (91.3%)
- Strict intersection enabled: True
- Decision runs used: 0/0
- Delta R mean: -
- Delta R median: -
- Share Delta R > 0: -
- Best pinball (model/h): sarima / 24h
- Best calibration ACE80: 15.92%
- DM significant pairs ($p < 0.05$): 3 / 9

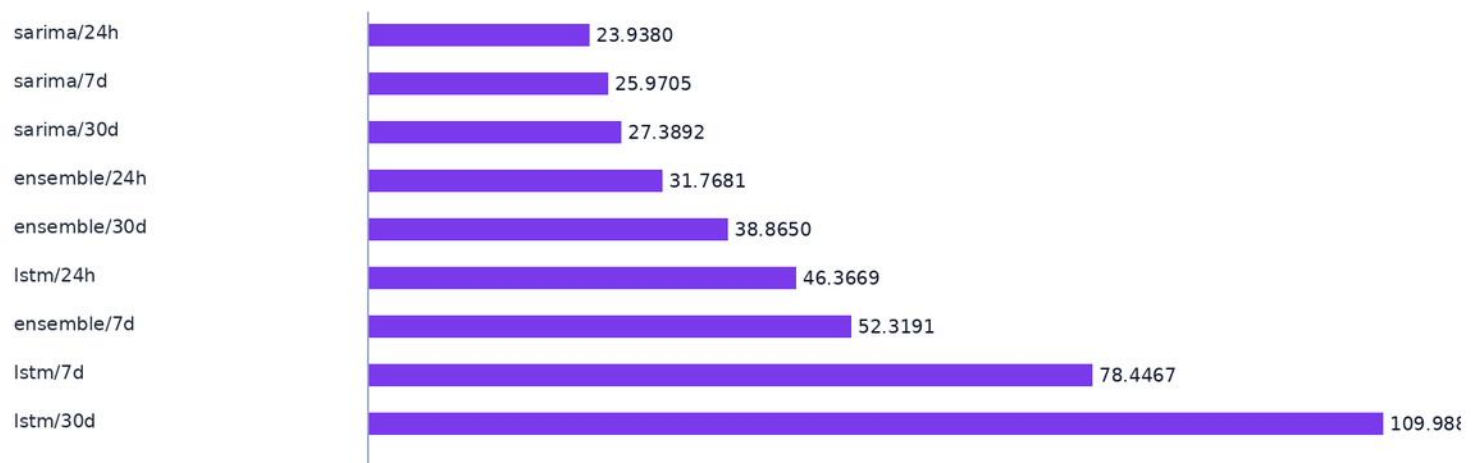

RMSE by model/horizon

Lower is better

MAE by model/horizon

Lower is better

SARIMA modes by horizon

RMSE comparison for seasonal handling modes

Delta R mean by horizon

Positive means decision support reduced expected loss
