

# Dissertation Evaluation Report

- Generated at: 2026-04-21T13:21:12.197663+00:00
- Device filter: DEMO-SARIMA-001
- Target range: 2026-04-16T00:00:00+00:00 .. 2026-05-16T00:00:00+00:00
- Actual range: 2026-04-16T00:00:00+00:00 .. 2026-05-16T00:00:00+00:00
- Forecast run IDs: 264, 265, 266
- Horizons: 7d
- Models: sarima, lstm, ensemble
- Baseline action: no\_action
- Bootstrap samples: 300
- Bootstrap block size L: auto
- Forecast points: 3864
- Points with actual (raw): 3864 (100.0%)
- Points compared (strict): 3528 (91.3%)
- Strict intersection enabled: True
- Decision runs used: 2/2
- Delta R mean: 497614.30
- Delta R median: 497614.30
- Share Delta R > 0: 100.00%
- Best pinball (model/h): ensemble / 7d
- Best calibration ACE80: 20.90%
- DM significant pairs ( $p < 0.05$ ): 1 / 3

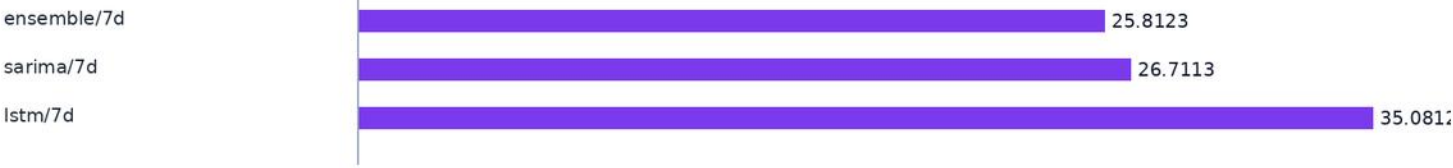

RMSE by model/horizon

Lower is better

# MAE by model/horizon

Lower is better

# SARIMA modes by horizon

RMSE comparison for seasonal handling modes

# Delta R mean by horizon

Positive means decision support reduced expected loss

horizon=30d
